

BELIZE 1981

N. costalis

1a. *Nasutitermes* sp. Im 3, ♀

From log being used as
firewood - June 7, 1981

Blue Hole, Belize coll. Tena
(Maya)

1B. *Termitophile* from 1A. Im

spec. pres.

2. *Amitermes* sp. 4, ♀ - dead
branch near bldg. Blue Hole,
Belize June 6, 1981

3. *Nasutitermes* sp. Dead down
branch, mitrail to building
Blue Hole, Belize June 7, 1981

TSV + vouchers *N. nigroparvulus*

4. *Amitermes* sp. Im, 4, ♀

June 6, 1981 dead branch c

Blue Hole - Belize c.

mini 5

86

monstrum sp.

5. *Heterotermes* sp. 2 + ♀

June 6, 1981 - Down dead

branch near building Blue Hole,

Selins (most destroyed, practical
was dissections on)

6. *Heterotermes* sp. June 8, 1981

Stump, heavily eaten, in ground -

Blue Hole, Selins 2, ♀

June 7

7. Combat 1: Large ant
~~was~~ running on a trail -

~~Heterotermes~~ added, trail
disrupted, 1 ♀ + 2 attached

and drove off ants

Microaerotermes

Combat 2 - Red army ant is

Heterotermes sp. - ants were driven

from trail, Termites attacked and
repelled them. Ant showed sign

g. ~~being~~ disturbed after termite
contact.

Combat 3 - Red army ant
no Nasutitermes sp. - Termites
repelled ants effectively June 8

7. ~~Beetle~~ Road - 17 mi.
from junction Lubantun
Rd.

June 8 Nasutitermes sp.

8. Scire Colony - Fever Pool
beside road to Blue Hole

4 mi. north of Blue Hole
2007 to present

June 8
9. Dead branch on ground beside
road in second-growth bordering
Columbia Rd. ca 5 mi. from

Blue Hole - (mbe) June 8

10. Staphylinids eating stray
termites at site of
nest picking - Nasutitermes sp.

11 June 8 - Beside road, Second
Growth, near store, 6 mi. from
Blue Hole, Belize. 3, ♀

~~90 20 30 40 50 60 70 80 90~~

12. June 8 - Beside Road - carbon
nest on palm tree, ca 1 1/2 ft
above ground - ca 6 mi. from
Blue Hole Station, cleared area,
beside road - Second-growth
forest *Nasutitermes sphaeroides*
100 4 in Hepane

June 9
Combat c Monaci (3) sp.

Got good pictures of -

Ants captured termites; showed temper-
distress after being fired on, but
went on to clear, then attack
more termites

Nest material with termites
in it placed in midst of
Canbal at 10:55 AM. After

1 hr: Termites numerous in
nest material and in
cavities. Insects on
surface of log.

13. *Armitia* sp. - from
large downy log growing
from ledge, Blue Hole
June 9, 1981

14. To record, in Cuz

Dead branch on ground, same
as #13, further up - Mary Anne
Gardner - June 9, 1981 - as in 13

^{Microceratus sp.}
15. ~~Heterotermus~~ sp. from
standing sheep - up trail
from Blue Hole Lodge Cairns
June 9.

16. Microceratus sp.
like octopilis in look
& smell, also behavior.
Tampa, M - Dead down
stump, HARD 4/9

Combat Monacis

Block of wood contains
ca 30 Nasutitermes sp. workers
& soldiers placed in path
of foraging Monacis.

Ants were instantly repelled
creeps around termites,
Termite soldiers fired on

any ant that approached,
group still intact after
30 min. Parties separated
ant leaving wood, later
returned. 2/ slow, but
repelled ants effectively
1 ♀ caught at beginning
1 ♀ " @ 45 min.

Terminated @ 1 hr. - Surv-
was returned to culture
& sprayed ants isolated to plastic cups
(care)

Amitermes sp. 4, ♀
17. Down wood near lodge @ Blue Hole,
Belize - 10 June 1981 - MSC.
(70) ~~20~~ 30 40 50

18. Neotermes sp. large
colony in rotten log on trail
to falls, Blue Hole, Belize
10 June 1981 - MSC
100 to 150

16 - Continued:

24 hrs. later - Survivors
= 3 living, 1 dead,
2 escaped

Combat, #15 - 12:30 PM

June 10

ca. 200

Termite from colony placed
in Monroe's trail @ 12:30

Ants seized worker immediately
also soldier

Nearly all termites captured
and carried off by ant
within 30 minutes

19. *Coptotermes* sp. under
bark, dead tree - Hole. Warren
Steiner - June 10, 1981
Blue Hole, Belize

20. *Anoplotermes* sp. Im, ♀
Blue Creek - Lodge
rotten branch

21. Log at entrance of
Columbia Forest

Soldiers lined
up along

N. ephratae

22 - Same as long as 21?

about 10 ft further down trail
in dead leaves - Placed in tray
as bait for predators
Predators observed @ 24, ♀

Waco's Ant farm
Dead trees inhabited
by ~~the~~ White-crowned Pigeon
Schizobrycon paraguayensis -
bung = Sun.

3 nests in area, all
in trees inhabited by
and protected by these
ants. Very incised!

mileage:
23. June 11, 1981 Forest Service
Station near Salamanca - get lost.

Small carton nest on side of orange
tree in cleared area -

200 to Hepato ; 21, 8 vouchers

Camp: 100 ♀, 100 ♂ in feeding
hall of Monastery.

15 min on established feeding
site -

24 June 11 - Forest Service Sta.

Carton nest on Dec. 200 y
to Luperon; ant predators
observed -

Combat: "Monacis" individuals

momentarily repulsed by 2
fire but soon recover and
attack grouped or isolated
workers. Carrying off large
numbers to nest.

25. Long complete carton nest

lying on ground behind

Ochard, Forest Service Sta.

Belize - June 11 - 200 to Luperon

ants ate these &
spread & despatch
N, 2, ♀, Guests pres.

26. Armitermes sp. Warren Feiner
Columbia ward, Feiner
June 11, 1981

27. Cryptotermes sp. Duvon
Log m. building, Blue
Creek. June 12, 1981
Beetle show Warren

28. Nasutitermes sp. Carter
nest on tree, low ground near
beach, Belmar Beach Hotel - June 15
100+ 2 / Im., 2, ♀

29. Nasutitermes ~~sp~~
Dangriga - on tree near
Pelican Beach Hotel - Carter
nest. 100⁺ y / Im., 21, ♀

South Huray, 45 mi. So. of Dangriga

30. Lunch Stop, Rd. to Blue Creek

Sandy Pine Scrub near sawmill
site - June 15, 1981 - under large
log -

31 - same as 30 - Amitermus sp.

32. Heterotermes sp.
more inv., dead branch

33 - Same data as 32

34. Amitermus sp. from
cow chip - same spot

35. Coprototermes sp.
in partly buried pine
log - old colony of carbon
earth mass inside -
same site, lunch stop.

Blue Creek again - June 17,
1981

37. Armitermes sp. June 17, 1981
Rotten log m. shelter MSC.
4, ♀

38. In rotten log, same area
as # 37 - 121

Hypertermes sp.
39- Rotten log further up
trail - with Amblypygid -

40. *Nasutitermes* sp.

Caston nest on side of big
tree near latrine - @ Blue Creek

Sta. - Nest with thin outer
envelope, primer inner cells
100% for glenn

41. *Ornitermes*

Dead log near shelter

42. *Kalotermitid* -

Hard standing stump
near shelter, saw

day In, 2, N

Colony to Larva

43. *Ornitermes* sp. ^{2/3} ♂

Ants, life cycle

44. Large Ammitum from
log - octopids

45. N. octopidi (?). from
large dead log near
Malaise trap, $\frac{1}{2}$ mi. from
shelter - - Live colony from
Spide June 17 home
N. glabriferus

46. Ammitum sp. June 18, 1968
down branch near Blue Creek,
 $\frac{1}{4}$ mi. upriver from shelter
nse. 2, ♀

FIELD NOTES : BELIZE

Collected by M.S. Collins unless otherwise indicated

- 1a. Nasutitermes sp. Im. S W from log being used as firewood; June 7, 1981
Blue Creek, Belize . Coll. Tina.
- 1b. Termitophiles from 1a : in special preservative (Warren Steiner) *(Barker's Soln.)*
changed to EIOH March 10, 1982
2. Amitermes sp., S,W ; dead branch near building, Blue Creek, June 6, 1981
3. Nasutitermes sp. from dead down branch near building, Blue Creek, June 7.
4. Amitermes sp. Im., S, W. June 6, 1981- Down branch at Blue Creek, Belize
5. Heterotermes sp. S.W.; June 6, 1981- from dead down branch near building,
Blue Creek
6. Heterotermes sp. June 7, 1981 ; From heavily-eaten stump in ground, Blue Creek;
S,W.
7. Combat 1 : Large ant running on trail ; Heterotermes added, trail disrupted, worker
and soldier termites attacked and drove off ants
8. Combat 2 - Red army ant vs Heterotermes sp.; ants were diverted from trail,
termites attacked and repelled them; ants showed signs of distress after
termite contact
9. Combat 3 - Red army ant vs Nasutitermes sp.; termites repelled ants effectively;
June 8, 1981
7. Berds Road, 0.7 mi. from junction with Lubantin Rd., Belize June 8
8. Seive colony, Fence post beside road to Blue Creek, 4 mi. north of Blue Creek ;
200 soldiers to hexane ; Nasutitermes sp. ; June 8.
9. ; from dead branch on ground beside road in second-growth
bordering Columbia Road, ca 5 mi. from Blue Creek
10. Staphylinidae eating stray termites at site of nest picking, Nasutitermes sp.,
June 9
11. Nasutitermes sp. , beside road, second growth, near store, 6 mi. from
Blue Creek ; S,W. June 8 ; *1 staphylinid in collection*
12. June 8 - Beside road, carton nest on palm tree ca 1½ ft. above ground ; ca 6 mi.
from Blue Creek, cleared area beside road, second-growth forest; 100 s in
hexane
- Combat with Monacis (?) sp. , photographed at length : Ants captured termites;
showed temporary distress after being fired upon, but went on to clean, then
attack more termites. Nest material with termites in it placed in midst of
combat at 10:55 AM. After 1 hour : Termites numerous in nest material and in
an orderly train to under surface of log - June 9
13. Amitermes sp. from large down log going uphill from lodge, Blue Creek, June 9.
14. June 9 - Log on ground, as in #13 but further up trail ; coll. Marianne
Early ;
15. Heterotermes sp, from a standing dead stump up trail from Blue Creek lodge
latrine ; June 9, 1981
16. Nasutitermes sp. - looks like N. octopilis, smells like it, acts like it;
June 9 ; dead, down HARD stump; S,W.
- Combat with Monacis (?); block of wood containing ca 30 Nasutitermes sp. workers
and soldiers placed in path of foraging Monacis; ants were instantly repelled;
circled around termites; termite soldiers fired on any ant that approached;
group still intact after 30 minutes. Parties separated out leaving wood, later
returned. Soldiers slow, but repelled ants effectively. 1 worker captured at
beginning of engagement ; another worker captured at 45 minutes combat time.
Observations terminated at 60 minutes. Surviving termites returned to culture ;
6 sprayed ants isolated to plastic cups. At 24 hours, 3 were alive ; 1 was
dead ; and 2 had escaped.
17. Amitermes sp. S,W. From down, dead wood near lodge at Blue Creek; 10 June,
1981.
18. Nasutitermes sp. large colony in rotten log on trail to falls, Blue Creek;
10 June 1981; 100 to hexane
Combat: 12:30 PM June 10; ca 200 termites from colony placed on Monacis
trail; ants seize workers and soldiers immediately; nearly all carried off
by ants within 30 minutes.
